INTRODUCTION

SHBS is an Electro-Mechanical Contracting Company

Our career had launched in Kingdom of Saudi Arabia. We are known as an Electro-Mechanical contracting company which undertake a major projects in Mechanical (HVAC – Fire Fighting System – Plumping) , Electrical (Low Voltage – Low Current Systems - Security and surveillance systems – Fire Alarm System) .

Our Principal activities include Design, Installation, Testing, Commissioning and Maintenance of Electro-Mechanical Works.

SERVICES

- We are completely offering integrated services such as safety, security, air conditioning plumbing and HVAC solutions. We assist our clients' needs to come up with the design that covers safety needs through top of the line certified products.
- We also offer a full line of HVAC, Plumbing, Electrical work, fire detection, suppression and fire fighting products and services. Whether you simply need portable fire extinguishers or the most advanced, fully integrated. We do installation, monitoring of variety service security systems, including intruder alarms, access control and video surveillance systems. Our experience allows us to integrate separate systems.

- Also, we conducted in supplying, installation, testing and deliver in good operating conditions the complete ventilating and Air Conditioning system.
- Our company shall be responsible for the maintenance of all systems at his own expense for duration of one year starting from the date of issue of the completion certificate. Maintenance shall include replacement of parts or whole equipment that shows any manufacturing or installation defects during operation.

- PARTNERS - trusted and reliable for international clients and contractors to meet their MEP requirements for building top class projects
- STAFFS – highly professional, license engineers and well experienced and trained staffs; also specialized in technicians and skilled workforce

COMMITMENT

To satisfy and meet all the requirements of our customers as per agreed projected time and quality cost.

MISSION

To strives continuously in order to provide high standard services through innovation.

OUR OPERATIONS

We are aligned with a strong focus on health and safety environment and quality concerns and abundant resources of highly skilled and self motivated engineers and staffs to make us a perfect preference for solving any kind of electro-mechanical work.

CUSTOMER ORIENTED SUPPORT

Our commitment does not stop with the successful installation of the systems but it continues with our professional after-sales service and support.

The management, designers and installation engineers are expert and well experienced to handle the job. Over Many years experienced and mastery in designing, specifying and installing custom systems. We are working hard to reach the competitive edge of the industry by running our own in-house training program in conjunction with courses provided by manufacturers as new systems are brought on to the market.
